Professor, PHD in Medicine

Honored worker of science and technology of Ukraine

Rector of Zaporozhye Medical Academy of Postgraduate Education of Ukraine MH,

Corresponding Member of NAS of Ukraine

Academician of Ukraine National Academy of Medical Sciences

Dear colleagues!

Yerevan State Medical University after M. Heratsi has always been famous for its traditions and highly qualified scientific, professorial and academic staff, who make their valuable contribution to the development of modern medicine.

The bright example of this is “The New Armenian Medical Journal” of Yerevan State Medical University after M. Heratsi under the guidance of the chief editor, honored worker of science, professor Arto Zilfyan. The journal has achieved great success in disseminating contemporary knowledge in the field of medicine both in CIS countries and overseas.

We welcome the initiative to release an issue of “The New Armenian Medical Journal” in cooperation with Zaporozhye Medical Academy of Postgraduate Education. We believe it’s a practical and interesting information resource for medical community.

Zaporozhye Medical Academy of Postgraduate Education is a modern center of postgraduate education and continuous professional development of doctors. The Academy has the highest (IV) accreditation level and is currently one of the leading higher medical institutions of postgraduate education in Ukraine.

According to the contemporary requirements, continuous multistage training of medical professionals in 62 specialties is carried out at 27 Academy Departments. Every year the Academy trains about 7000 doctors who study for postgraduate degree, 300 interns who undertake Internship, more than 100 specialists, who study at Postgraduate Department and Clinical Residency as well as 45-50 clinical residents, the majority of whom come from abroad.

We’d like to express our gratitude and best wishes to the editorial board of “The New Armenian Medical Journal”. We sincerely hope this kind of endeavor will greatly benefit to the further development of medical science.

We are always open to collaboration!
